
CAR PARKING

Computer Programing

PRESENTED BY :-

- MUHAMMAD RAMZAN
- AHTISHAM SALEEM

INTRODUCTION:

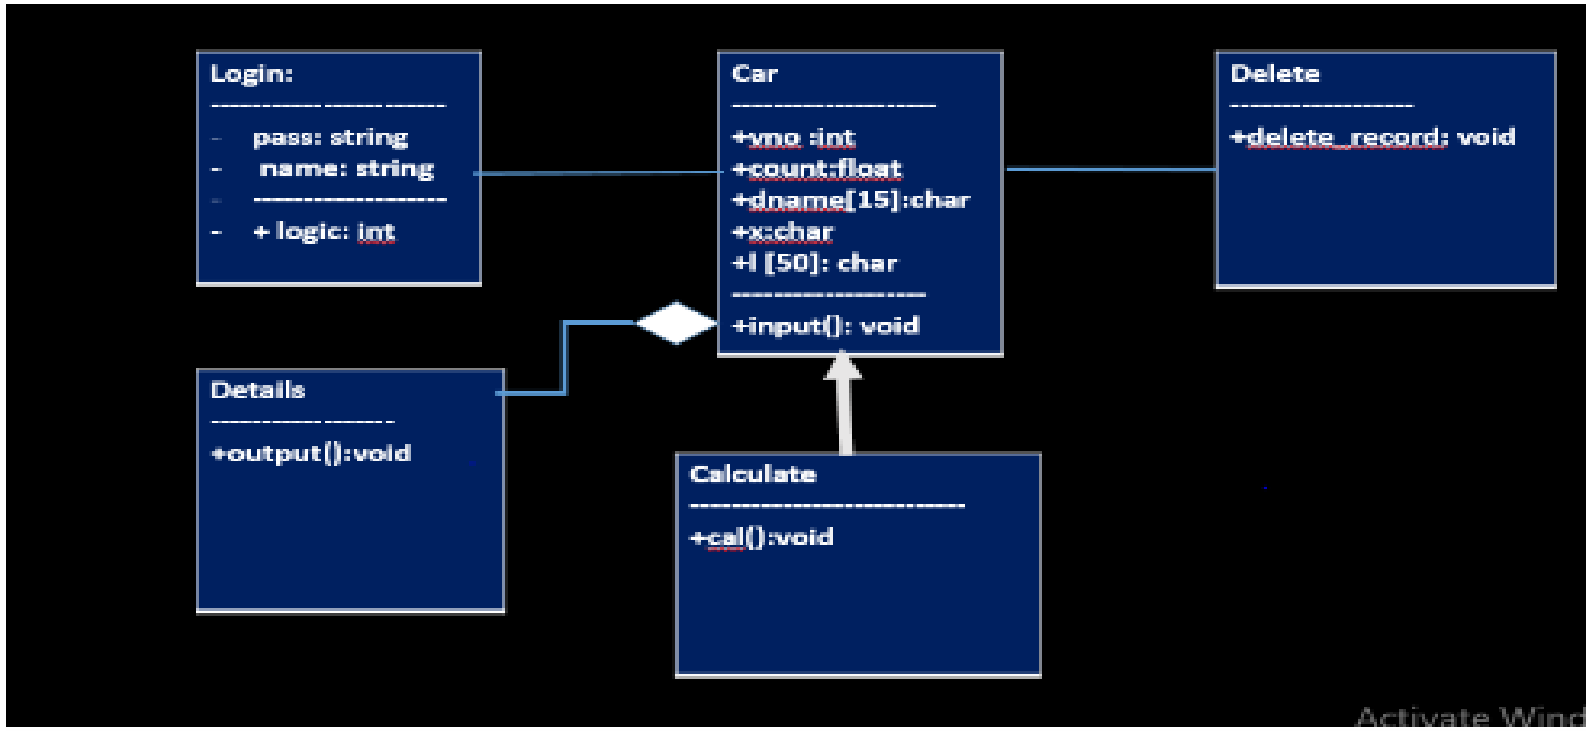
Car parking is a system of park the cars at some known position with reference of driver name, car number,

Time to park the car and position of parking are fixed and everyone can park and unpark the car easily.

AGENDA

- ❑Introduction
- ❑Related to park car in a manner way
- ❑Easy to find the location of the car.
- ❑Time to park the car
- ❑Expenses

CLASS DIAGRAM



CLASS IMPLEMENTATIONS:

1..CLASS LOGIN:

```
class LOGIN
{
     car *ptr;
     string pass ="";
    char name;
public:
     int login();
};
int LOGIN::login(){
    cout <<"\n\n\n\n\n\n\n\t\t\t\t\tCar Parking Reservation System Login";
    cout << "\n\n\n\n\n\n\n\t\t\t\t\t\tEnter Password: ";
    name = _getch();
    while(name != 13){//character 13 is enter
        pass.push_back(name);
        cout << '*';
        name = _getch();
    }
    if(pass == "pass"){
        cout << "\n\n\n\n\t\t\t\t\t  Access Granted! Welcome To Our System \n\n";
        system("PAUSE");
```

2. CLASS CAR:

```
class car
{
    LOGIN *ptr;//making association with LOGIN class
    DELETE *ptr2;//making association with DELETE class
    public:
    int vno;
    float count;
    char  dname[15],x,l[50];
    void input()
    {
        fstream file;
```

3.CLASS DETAILS:

```
class DETAILS
{ //public car:
    car obj;
    public:
    void output()
    {
        fstream file;
        file.open("Parking.txt",ios::in);
        while(!file.eof())
        {
            file>>obj.dname>>obj.vno>>obj.count>>obj.l;
        }
        cout<<"\n\n\t\tThe Driver Name : "<<obj.dname<<endl;
        cout<<"\n\n\t\tThe Car No : "<<obj.vno<<endl;
        cout<<"\n\n\t\tThe Hours Of Stay : " <<obj.count;
        cout<<"\n\n\t\tThe Time Slot Of Parking : " <<obj.l;

    }
};
```

4.CLASS CALCULATE:

```
class CALCULATE:
     public car
{
     public:
void cal()
     {

          cout<<"\n\t\n\tAre you a V.I.P: y/n ";
          cin>>x;
          if(x=='y')
     {
          system("CLS");
          cout<<"\n\t\n\tThe total expense during parking   ";
          cout<<"20 rupees";
     }
     else
     {
          system("CLS");
```

5.CLASS DELETE

```
class DELETE{
    public:
        car *ptr;//making association with car class
void delete_record()
{
    int n;
    system("CLS");
    cout<<"\n\n\t\tEnter the car no you want to get depart : ";
    cin>>n;
    ifstream inFile;
    inFile.open("parking3.dat", ios::binary);
    ofstream outFile;
    outFile.open("temp.dat", ios::out | ios::binary);
    while(inFile.read((char*)&a, sizeof(a)))
    {
        if(a.vno!= n)
        {

            outFile.write((char*)&a, sizeof(a));
        }
```

====== CAR PARKING RESERVATION SYSTEM ======

        ======================
          1. Arrival of a Car
          2. Total no of cars Arrived
          3. Total parking charges of all cars with details
          4. Departure of the car
          5. Exit Program
        ======================
         Select Your Choice ::
```

PARKING:

"C:\Users\EliteBook\Videos\New folder\CP project\bin\Debug\CP project.exe"

```
Enter the name of driver : ramzan

Enter the car no : 222

Enter the no of hours of stay : 22

Enter the time slot : 12

Parking Available! You can park your car.
Car got parked!!
```

CAR POSITION:

```
The Car position in parking lot : 1
        The Driver Name : ramzan

        The Car No : 222

        The Hours Of Stay : 22
        The Time Slot Of Parking : 12

Press any key to continue . . .
```

TOTAL EXPENSE:

```
The total expense during parking  1.17682e-037 rupees
        The Driver Name : ramzan

        The Car No : 222

        The Hours Of Stay : 22
        The Time Slot Of Parking : 12

Are you a V.I.P: y/n
```

DELETED CAR:

```
Enter the car no you want to get depart : 222

 Parking Record Deleted
```

EXIT CAR:

```
                    Brought To You By: code-projects.org

Process returned 0 (0x0)   execution time : 219.192 s
Press any key to continue.
```
